

Abstract

Packages made from multilayer structures useful for packaging bone-in meat or other like products are provided. More specifically, packages made from multilayer structures are provided that have sufficient rigidity and strength to contain bone-in meat or other like products, while also maintaining good oxygen barrier properties. In addition, packages made from multilayer structures are provided for packaging bone-in meat and other like products that can easily seal to themselves or to other structures. Moreover, packages are provided made from multilayer structures that may be biaxially oriented and heat-shrinkable.
